EduTale Transforming Learning into Visuals

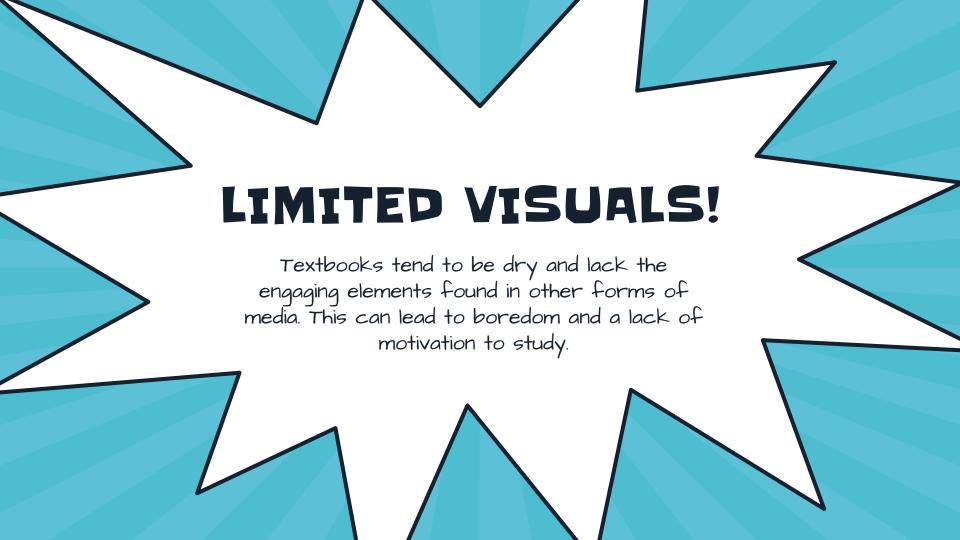

Students often face several challenges while reading their school books or course books. This hinders their comprehension and retention of the topics. As a result, many students dislike reading and studying and they tend to mostly rote learn. They lack understanding of some important topics due to which they face problems in the future.

DENSITY!

Textbooks are typically lengthy and dense with information. Students may feel overwhelmed by the sheer volume of content, making it challenging to focus and retain key concepts.

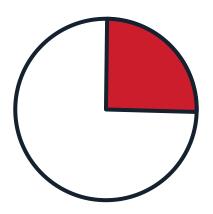

WRITTEN VS VISUAL LEARNING

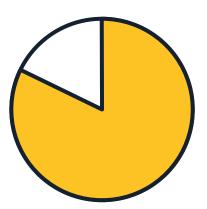

25%

of written or spoken Information retained by students

80%

of visual Information retained by students

Our solution is to make learning engaging and fun by transforming study topics into captivating stories and visual comics by introducing various characters that students can relate to. In this way they can understand even the complex topics easily.

WORKFLOW OF OUR APP

STEP 1

Students will register by entering their details

STEP 3

Our AI model will create a storyline

Students will choose a topic

Our model will transform that story into a comic strip

FEATURES

CHARACTER CUSTOMIZATION

Users can create and customize characters that will be part of the story

MULTI PLATFORM

accessible on various devices, including smartphones, tablets, and desktop computers
